

Conditions

The supplied quotation is valid for the installation of a backstop netting system on a clear surface, free from any obstacles.

The client should provide Expo-Line with a floor plan containing the necessary information regarding underground cabling or any other obstacles.

In the absence of a floor plan, we will assume that the surface is clear and will reject any further responsibility.

The installation of the backstop netting system requires a passage of at least 2 meters up to and surrounding the location of the backstop netting system.
